

unitar

United Nations Institute for Training and Research

Summary of Project 1

Pollutant Release and Transfer Registers (PRTRs)

Partner Organizations

Implementing Agency

Executing Agency

Partner Countries

Focus of the Project

To design PRTR systems in each participating country to comply with a number of obligations under the Stockholm Convention

Period of Time

2009 - 2012

Total Funds

3,454,320 USD

[950,000 USD (GEF) + 2,504,320 USD (co-finance)]

Main Outputs

All countries formed a National Steering Committee (or equivalent) for PRTRs

All countries have carried out a pilot demonstration, however the scope and implementation of the pilot differs

All countries have reviewed their legal frameworks and explored possible entries for PRTR

All countries have developed a National Executive proposal on PRTR Implementation

All countries, except Ukraine, have endorsed the proposal

Lessons Learned

Inclusion of all concerned stakeholders since the inception of the project is key for success

Strong technical support is needed (national or international), including relevant guidance

A mandatory PRTR is likely to be more successful than a voluntary scheme

A strong awareness raising campaign is proven to be effective in setting up a PRTR

Summary of Project 1
