BACKGROUND

UNITAR is delighted to start the new "International Law in Focus" Workshop Series that will explore cutting-edge legal topics.

The second topic to focus on will be International Humanitarian Law and Cyber Warfare. War remains a matter of great concern to humanity. Recent conflicts have demonstrated that the ravages of war continue to have a devastating impact especially on the civilian population. With the increasing amount of states developing military

cyber capabilities, the interplay between the “cyber” and “real” realm of war needs to be addressed. Through the course of 5 workshops participants will explore methods and means of cyber warfare, and learn to distinguish between the applicability of international humanitarian law to cyber operations in international armed conflicts and non-international armed conflicts.

LEARNING OBJECTIVES

At the end of this session, participants will be able to:

- Describe the main rules of international humanitarian law and differentiate between those which apply to the cyberspace and the others;
- Apply the main rules governing international humanitarian law to cyber-warfare;
- Explain the link between Human rights and the cyber realm.

The second session of the International Law in Focus Series will focus on the International Humanitarian Law and Cyber Warfare through a series of 5 consecutive workshops covering the following topics:
