ANTECEDENTES

Humankind is indisputably entering a new digital era. The impact of rapid technological and scientific advances on our lives is so great that World Economic Forum’s founder Klaus Schwab termed this process as the Fourth Industrial Revolution. We are the witnesses of the transcendence through new frontiers.

These new frontiers go beyond traditional understanding of every aspect of human activity. Unlike in the past, diplomacy and international affairs can no longer afford to slowly adapt to those changes as their pace demands almost business-like agility to stay abreast and relevant.

Diplomacy 4.0 is UNITAR’s answer to these new challenges. The concept explores the nexus between diplomacy and areas of artificial intelligence, cybersecurity, scientific advancements and other significant issues, paving the way for the next generation of international affairs professionals.

OBJETIVOS DEL EVENTO

Building up on the Diplomacy 4.0 concept, UNITAR designed its first ever 5-day field visit to Geneva tackling the most pressing issues at the intersection of diplomacy and technology. The programme will provide its participants not only with theoretical knowledge but also practical skills on how to implement best practices.
Its overarching purpose is to prepare participants for the continuously deepening interdependence between diplomacy and technology and equip them with necessary skills to exercise those innovations in practice. The programme further intends to raise awareness about Diplomacy 4.0 in the international community, thereby stimulating modernisation of diplomatic practices.

Last but not least, it aspires to build up a knowledge hub, bringing subject matter experts and policy-practitioners together to form a community discussing latest developments in the field and producing practical solutions. It also aspires to give its participants the opportunity to gain valuable insights into possible future career steps in this direction.

CONTENIDO Y ESTRUCTURA

In our rapidly changing world, diplomats and governments cannot afford to stay behind. The first edition of the Diplomacy 4.0 field visit will provide them with competitive edge and all necessary knowledge to effectively navigate the cross-section of diplomacy and digital technology.

The field visit serves the purpose of providing a broad overview on Diplomacy 4.0 and thereby preparing the participants for the challenges and opportunities in this field. The training programme will be 5 days of length and focus on the following themes:

- Theme 1 - Digital Diplomacy
- Theme 2 - Cybersecurity
- Theme 3 - Artificial Intelligence
- Theme 4 - Internet Governance
- Theme 5 - Science Diplomacy

Hosting 35 international organizations and more than 250 NGOs, the city of Geneva offers itself for a whole series of formative experiences. UNITAR hosts the activity in the historic Palace of Nations and provides a nuanced balance between the following different components:

**Expert Lectures:**

UNITAR’s professional network across Geneva allows it to organize a series of 1-2-hour expert lectures, in which participants can directly learn from UN personal or other high-level officials. Previous training programmes have included lectures from the following organizations:

- United Nations Office at Geneva (UNOG)
- International Telecommunication Union (ITU)
- European Centre for Nuclear Research (CERN)
- World Economic Forum (WEF)

**Training Workshops:**

As its core activity and raison d’être, UNITAR provides several face-to-face workshops to the participants. Delivered by experts such as ambassadors, previous programmes have included the following workshops:

- Digital Diplomacy
- Cybersecurity
- Artificial Intelligence
- Science Diplomacy

**Multilateral Conferences:**

With its more than 10,000 conferences a year, the United Nations Office at Geneva (UNOG) counts as one of the most active international conference centres in the world. UNITAR offers participants to attend such meetings and thereby experience multilateral negotiations first-hand:
UNITARD will be responsible for the overall design, coordination and implementation of the Diplomacy 4.0 Training Programme. It will liaise with participants on a regular basis prior to the activity's implementation in order to ensure a smooth and flawless organization for everyone involved.

The participants are responsible to purchase their own travel tickets to and from Geneva as well as to apply for visa to
Switzerland. UNITAR gladly supports this process with the help of official visa invitation letters. Participants further need to take care of their own accommodation and daily meals.

UNITAR will sponsor a welcome dinner to the participants, a welcome package including relevant material, entry tickets to sights and museums as well as the transportation cost during the activity. Please note that as of now, no scholarships are available to facilitate participation.
