

## Public Courses

## Public Courses and Events

We offer courses and events that run throughout the year and are open to the general public or a specific target audience. These activities are usually fee-based and may be offered through face-to-face training, seminars, workshops or e-Learning courses.

There are two types of public events that you will find at UNITAR.

- **Public events - by registration** are open to individuals from the targeted audiences and are based on a simple registration procedure. Such events may be organized on a fee-paying or a free-of-charge basis.
- **Public events - by application** are open to individuals meeting specific target audience requirements and are based on an application and selection procedure. Such events may be organized on a fee-paying or a free-of-charge basis.

Please be sure to read the criteria and application procedures for each event as requirements may vary by course.
