**Type:** Course  
**Location:** Web Based  
**Date:** Free and Open Event  
**Duration of event:** 1 Days  
**Programme Area:** Environment, Climate Change  
**Specific Target Audience:** No  
**Website:** [http://www.unccelearn.org](http://www.unccelearn.org)  
**Price:** No Fee  
**Event Focal Point Email:** uncclearn@unitar.org  
**Partnership:** UN CC:Learn Partnership, UNDP, Swedish Development Cooperation (SIDA)

**BACKGROUND**

IMPORTANT: Please register directly on the course website: [http://unccelearn.org/](http://unccelearn.org/)

Background information about the planet and its environment, climate change, and how this course can help support the information. The course is aimed at those who want to understand the implications of climate change for their work. The course is led by a renowned expert in the field of climate change, Kit Nicholson.

**CONTENT AND STRUCTURE**

The content and structure of the course are designed to be interactive and engaging. The course will be facilitated by Kit Nicholson, a renowned expert in the field of climate change. The course will be available online and will be accessible to all participants. The course will be followed by a Q&A session where participants can ask questions and receive feedback on their learning.
TARGETED AUDIENCE

The presentation of this content is intended to summarize the research findings of a study conducted in the field of meteorological research. The research team analyzed the data collected from various meteorological stations across different regions in order to understand the patterns and trends in the climate. The results of this research have been published in several scientific journals, and the findings are expected to provide valuable insights for policymakers and stakeholders in the field of climate research.
