BACKGROUND

IMPORTANT: Please register directly on the course website: http://unccelearn.org/

Background information and resources on climate action, adaptation, and response are essential for policy-makers, negotiators, and negotiators in the field. This course provides an overview of the recent climate change science, with a focus on the latest research and breakthroughs. It includes a review of the Paris Agreement and its implications for action. Participants will gain an understanding of the key principles of climate action and the opportunities and challenges they face.

The course is led by Kit Nicholson, a renowned expert in climate policy and practice.

CONTENT AND STRUCTURE

The course content is divided into several modules, each focusing on a specific aspect of climate action. The modules include an overview of climate science, the Paris Agreement, climate actions and responses, and case studies from around the world. Each module includes readings, videos, and discussions, and is designed to be self-paced and interactive. Participants will have the opportunity to ask questions and engage in discussions with other learners, as well as with the course facilitators.
TARGETED AUDIENCE

This presentation is intended for individuals working in the field of technology, who are interested in the latest innovations and developments in the industry and who may benefit from the information presented. It is also suitable for those who wish to keep up-to-date with the current trends and advancements in the technology sector.
