

MANAGEMENT PRACTICES FOR SAFER ROADS TOOLKIT

LEARNING APP LAUNCH EVENT

Significant progress on road safety can be achieved through global cooperation, implementation of evidence-based strategies and engagement with all relevant actors, including the private sector, as well as additional innovative approaches.

With the aim of contributing to advance road safety and to join the global activities taking place during the World Day of Remembrance for Road Traffic Victims, UNITAR is launching the **Management Practices for Safer Roads Toolkit Learning App** which presents a practical management methodology that can be applied in the field of road safety.

The App provides in-hand practical solutions, participatory contributions from different stakeholders including the private sector, and results-based interventions. It highlights projects in which the methodology has been implemented and tested in cities in Brazil, China, Dominican Republic, India, Mexico and South Africa. It also features a checklist to support users to monitor their progress throughout the different stages of the “Plan-Do-Check-Act” Toolkit’s methodology.

SAVE THE DATE:

12 November 2020 | 11:00 -12:30 EST
