In 2016, the General Assembly expressed its resolve to use the QCPR

"... as the main instrument to better position United Nations operational activities for development to support countries in their efforts to implement the 2030 Agenda for Sustainable Development in a coherent and integrated manner [...] recognizing that this requires a United Nations development system that is more strategic, accountable, transparent, collaborative, efficient, effective and results-oriented "

# WHAT ARE THE SIGNALS OF CHANGE?

- ⇒Different changes for different authorities: Foreign Affairs, Planning Ministries, Line Ministries e.g. Health
- UN system visibly converging around the SDGs, behind Government strategies, in an integrated way
- Resident Coordinators, as representatives of the Secretary-General, pulling the system together and championing the SDGs
- Fewer individual UN agency approaches, more coordinated UNCT dialogues and increased activity of smaller, specialized UN agencies and more efficient operations
- More joint UN fundraising, saying 'no' when necessary/outside priorities
- Comprehensive, higher quality collective reporting products

# LOOKING TOWARDS THE 2020 QCPR

The new QCPR could:

- support and encourage the UN system to build on the changes and efforts through the reform since 2016 and
- focus on embedding, implementing and sustaining the system-wide approach that we have built.

Decade of Action for SDGs –Coherence across the programming cycle: planning, programming, M&E and reporting Reinforce specific areas requiring roll-out by all agencies – aligning planning & reporting, levy, RC pool etc

Drive a transformative approach to funding as an enabler for the system– Funding Compact implementation Provide policy direction on substantive programmatic issues – data; transitions; partnerships with IFIs etc
