

Green Legacy Hiroshima

The 14th GLH Working Group (WG) meeting was hosted at ANT-Hiroshima offices on October 29.

The highlights of reports from international partners were many: the delivery of saplings to the UN Economic Commission (UNECA) in Africa, carried by GLH master gardener and planted at UNECA Headquarters on UN Day; the planting ceremony at the University of Ljubljana, Slovenia; and plantings in a number of member cities of Mayors for Peace, notably symbolic plantings in Kazakhstan and in the Republic of South Korea.

WG members also received an update on status of 2014-15 seed collection from the master gardener and other members of GLH team.

Finally, members discussed progress with the plaque design, and a number of other pending items including the GLH brochure, an award application process currently underway, and the next UNITAR Public Session dedicated to GLH, to be held in the first half of 2015.
